PROFESSIONAL SUMMARY

Mechanical Engineering student with hands-on experience in R&D, advanced manufacturing, and prototyping. Currently working as a Prototype Engineer specializing in LFAM, experimental builds, materials validation, and process development. President of a national engineering organization representing 40+ universities, leading executive operations, strategic initiatives, and cross-functional teams across the country.

SKILLS

Engineering: R&D, Prototype Engineering, Experimental Testing & Validation, Large Format Additive Manufacturing (LFAM), Additive & Hybrid Manufacturing, Design for Manufacturing, Process Development & Improvement, Prototyping & Fabrication, SolidWorks, Siemens NX, Autodesk Inventor, Minitab

Leadership: Cross-Functional Collaboration, Technical Communication, Project Execution, Team Development, Organizational Management

EXPERIENCE

Prototype Engineer Jan 2025 – Present
Additive Engineering Solutions Akron, OH

- Develop, fabricate, test, and iterate prototype components and experimental builds for advanced manufacturing applications, with 90% of tooling serving the aerospace sector.
- Lead projects from concept through prototype delivery, balancing performance, quality, manufacturability, and timelines.
- Drive development and validation of Large Format Additive Manufacturing (LFAM) processes, materials, and print strategies.
- Troubleshoot technical challenges with engineering and manufacturing teams and implement design and process improvements.
- Develop test methods, perform post-processing and evaluation, and document results supporting process development.

President 2023 – Present
National Association of Engineering Student Councils (NAESC) U.S. Nonprofit

- Lead executive operations and strategic direction of a national organization representing engineering students across 40+ universities.
- Direct a national executive leadership team, coordinating initiatives across multiple regions and committees.
- Oversee governance, organizational planning, financial strategy, and execution of national programs and events.
- Present strategic updates and organizational performance to the Board of Directors and member-school leadership while mentoring executive and regional leaders.

Vice President 2022 – May 2026
Engineering Student Council, The University of Akron Akron, OH

- Collaborated with a 12-member executive board to improve engagement across 3,000+ engineering students.
- Planned and executed STEM outreach initiatives, coordinating logistics, volunteers, schedules, and event responsibilities.
- Managed organizational communications, documentation, recruitment, and executive meetings.

Product Engineer Co-op May 2023 – Aug 2024
PCC Airfoils LLC Minerva, OH

- Analyzed investment casting processes in a high-volume manufacturing environment and identified process leaks and inconsistencies, supporting corrective actions with cross-functional teams.
- Led a co-op project recovering lost, on-hold, and unprocessed scrap parts back into production, recouping \$250,000+ in materials.
- Presented technical findings and process improvement recommendations to engineering and operations leadership.

EDUCATION

The University of Akron Akron, OH
B.S. Mechanical Engineering, Minor: Business Administration. Expected Spring 2027
